Ref: 6973696562258

Smart Wi-Fi Ambient Light Meross MSL450HK-EU (HomeKit)

### Meross MSL450HK-EU smart night light (HomeKit)

The Meross MSL450HK-EU smart night light will be the perfect addition to a bedroom or child's room. Its elegant design will blend in with any interior style, creating a pleasant atmosphere in the room. It allows you to adjust the colour temperature, brightness and colour change. You can control it from a distance, using the Meross app or simple voice commands. No additional hub is required for its operation.

### Light up the room with colours

The Meross smart light will help you create a fantastic atmosphere in a room in almost any situation. Not only does it allow you to adjust the brightness and colour temperature from 2000K-5700K, but also to select a colour. With up to 16 million colours at your disposal, you can easily adjust the lighting to suit your mood or the occasion. A romantic dinner with warm, pink light? Or do you need subdued white lighting while you work? The choice is yours.

### Lighting to suit your day

You can now set timers and operating schedules that adapt the lighting to your day. Do you want the light to gently fade out at night to help you fall asleep? Or would you prefer the light to come on when you get home from work? All of this is now possible - with just a few simple settings in the Meross app.

All it takes is a simple voice command

Do you want to dim the lights? Or maybe you forgot to switch off the light when you went to bed and don't feel like getting up? Now all it takes is a few words and your commands will be executed instantly! Thanks to compatibility with popular voice assistants such as Amazon Alexa, Google Assistant or Siri, you can control the lighting with simple voice commands. See for yourself how convenient it is.

Touch control

Operating the light won't be a hassle for you. It features an intuitive touch panel that allows you to precisely adjust the lighting to your preferences. You can use it to freely change the colours of the light, adjust the brightness, choose from different modes or even set timers.
