

Backpack strap Telesin mount kit with J-hook for sports came

Ref: 6972860170053

Backpack strap Telesin mount kit with J-hook for sports cameras (GP-BPM-003)

Telesin backpack strap mount kit with J-hook mount for sports cameras (GP-BPM-003)

Free your hands and create original shots when you're biking, conquering mountain peaks or skiing downhill. Telesin's Velcro, non-slip strap allows you to securely attach your sports camera to your backpack. The included J-hook mount gives you plenty of options for using the accessory.

Anti-skid and stable

The inside of the strap is made of PU material. It is also lined with T-type silicone. So the accessory is non-slip - it won't shake or slip off your backpack straps, so it won't ruin your dream shots. This gives you almost unlimited freedom to record even the most dynamic footage.

Improved Velcro closure

The use of superior quality Velcro makes the strap extremely easy and convenient to install, yet reliable. Once you fasten it, it will stably stay in place. You do not have to worry that it will suddenly detach itself and fall off, causing damage to your camera. Velcro is characterized by incredible adhesion, so it ensures complete safety of use.

Wide compatibility

Do you own a GoPro or XiaoYi camera? Or are you the lucky owner of a DJI Osmo Action or SJCAM? The Telesin mount strap will be a great choice! The accessory is compatible with most popular brands of sports cameras on the market. Attach your device to it and capture all your precious moments in stunning images!

Record the way you want

The J-hook mount gives you the ability to use the strap in multiple ways. You can easily mount your housing sports camera on it. Mounting is extremely easy and only takes a few moments.

Surprisingly high lifting capacity

Despite its small size, the accessory stands out for its impressive maximum load. It can handle devices weighing up to 2kg, which means that it will work well not only in conjunction with sports cameras, but also SLR cameras, for example. Note: to ensure safety of use, we recommend using devices weighing up to 1.5 kg.

In the box

x1 Backpack strap mount

x1 J-hook mount

x1 Long screw

Brand

Telesin
