Earphones TWS QCY T19 (black)

Do you value high quality sound and can't imagine a day without music? Opt for the TWS QCY T19 headphones, which offer crystal-clear HiFi sound, a long operating time of up to 30 h and ultra-low latency that will delight game and video fans. Also noteworthy is the ENC noise cancellation that will make conversations easier, as well as the intuitive touchpads. The T19s also feature a gaming mode.

Superior sound quality

The TWS QCY T19s are equipped with 10-millimetre dynamic drivers to deliver outstanding audio quality, crisp highs and deep bass when listening to a variety of music genres. HiFi sound will make you feel like you're at a concert with the QCY T19 and rediscover the beauty of your favourite songs.

Perfect for conversations

The QCY T19 wireless headphones use four microphones and an intelligent ENC algorithm to effectively capture your voice and filter out background noise. So you can communicate effectively with others and hear your voice in crystal clear sound. Need to take a call on the bus? No problem with the QCY T19!

Up to 30 hours of operation

Listen to music all day long without worrying about the headphones running out of power. The T19 are equipped with powerful batteries and provide up to 4.5 hours of talk time and 7.5 hours of playback time. Importantly, the charging case has a 380 mAh battery and can extend their runtime to up to 30 h!

Practical touch panels

The T19s allow you to conveniently manage basic functions without having to reach for your smartphone. The T19's practical touchpads allow you to pause and resume playback, answer or reject a call, change the song, start the voice assistant or activate gaming mode, just to name a few.

Ultra-low latency and app

Do you like watching movies on your smartphone? Or do you often follow concert coverage? The QCY T19 is perfect for you, thanks to its exceptionally low latency and perfect synchronisation between video and audio. What's more, you can install the QCY app (available for Android or iOS) and use the equalizer or sleep mode, for example.

Well designed

Thanks to their ergonomic design, the headphones stay firmly in your ears and don't cause discomfort, even during long hours of use. Pairing is quick and convenient, too: just take the headphones out of the case and use the pop-up window on your smartphone. The headphones then automatically recognise your device the next time you use them.
