

Hard Drive Enclosure Orico HDD, 3.5 Inch, 4 Bay, USB 3.0 typ

Ref: 6936761894173

Hard Drive Enclosure Orico HDD, 3.5 Inch, 4 Bay, USB 3.0 type B

Orico external enclosure for 4 2.5/3.5" hard drives

This versatile external enclosure by Orico will accommodate up to 4 2.5/3.5" SATA HDDs/SSDs with capacities up to 16TB each. The USB 3.0 interface provides file transfer speeds of up to 5Gbps. A built-in 150W power adapter ensures stable operation. The enclosure is user-friendly, easy to install and durable - it will prove itself in many different applications.

Copy your files in just a few moments

Tired of waiting endlessly for your files to be copied? We have excellent news for you! The Orico enclosure supports the SATA 3.0 to USB 3.0 connection scheme and the UASP protocol to deliver transfer speeds of up to 5Gbps. Now it takes only 3 seconds to transfer about 1GB of data. Your photos, videos or documents will be copied in no time!

Reliable power source

The product comes with a brand new and improved 150W power adapter. So you can enjoy smooth, stable and reliable operation of the case. Such an optimized power source will make you forget about any delays, device stuttering or connection problems.

Up to 64TB of space for your files

Get even more storage space for your files. The enclosure is designed for up to 4 hard drives. The capacity of each of them can be up to

16TB. So in total you have the possibility to enjoy up to 64TB of additional storage space!

Even longer hard drive life

Save energy and enjoy a longer life for your hard drive. The enclosure uses modern, intelligent design to automatically go into the sleep mode after 10 minutes of inactivity. What does this mean? Reducing hard drive usage helps prolong its lifespan. It also reduces power consumption.

Dual heat dissipation system

Concerned that your device might overheat? Don't be! The product is equipped with a double heat dissipation system. A quiet, high-powered fan ensures reliable convection, which, combined with the honeycomb-shaped holes in the enclosure, keeps the temperature at an optimal level.

Effective protection against damage

This is not the end of the solutions used in the production process to increase the safety of use. The product is equipped with a protection system against short circuit, overcurrent, leakage and overvoltage. So you can be sure that both the case and the hard drives inside are properly protected against damage.

Created to meet the diverse needs of users

Mounting and using the case will not cause you any problem. The product is compatible with most 2.5"/3.5" SATA hard drives. You don't even have to use tools to insert them into the selected compartments! LED indicators and an easily accessible switch allow for easy operation of the enclosure. Note: we also recommend using the Orico 1125SS adapter.

Detailed design

The enclosure is made from a durable aluminum alloy and is up to 4mm thick. This makes it extremely durable and resistant to damage. Each hard drive compartment is equipped with a security lock, so you can further protect your data. Moreover, non-slip pads located on the bottom of the device allow you to place it stably on any flat surface.
