Wired Earphones Joyroom JR-EW07 (white)

Discover even better sound quality and experience how great your favorite songs can sound. Joyroom JR-EW07 earphones are equipped with 14.2mm drivers, allowing them to deliver deep, clear, and detail-rich audio. They also feature an ergonomic design that guarantees unmatched comfort during use. Additionally, the built-in microphone allows for easy phone conversations.

Excellent Sound Quality

Now you can feel like you're at a concert wherever you are. The JR-EW07 earphones have built-in 14.2mm drivers that allow you to enjoy fantastic audio quality. Hear previously unnoticed details in your favorite songs and be amazed by the perfect harmony. Joyroom takes the musical experience to a whole new level!

Hands-Free Phone Calls

Joyroom earphones provide excellent sound quality not only when listening to music but also during phone calls. They are equipped with a highly sensitive microphone that accurately captures your voice even in exceptionally noisy environments. Crowded shopping center or bus - now you and your conversation partner can easily hear each other!

User-Friendly

Thanks to a carefully designed ergonomic construction, these earphones stay securely in your ears and won't fall out while remaining very comfortable. Don't worry about pain or fatigue! Furthermore, the integrated cable remote of the JR-EW07 model allows you to adjust the volume, pause playback, skip songs, or answer calls.
