

Bearing Puller Deli Tools EDL-E103

Bearing Puller Deli Tools EDL-E103

Ref: 6975495595277

Deli Tools EDL-E103 bearing puller

The bearing puller is an extremely useful tool that allows you to remove bearings easily and quickly. The tool consists of two parts: an adjustable handle and jaws that you can adjust to the size of the bearing. The product is made of high-quality materials, making it extremely durable and long-lasting. It is simple to use, yet effective. With it you will remove bearings without damaging the axle or shaft. This is especially important for service work, where time and precision are crucial. The bearing puller is a tool that should be found in every automotive workshop, as well as in mechanical and electromechanical workshops.
