

Set of 8 filters Freewell DJI Osmo Pocket 3

Set of 8 filters Freewell DJI Osmo Pocket 3

Ref: 6972971864902

Freewell DJI Osmo Pocket 3 - All Day -8Pack.

The All Day Kit is a complete set of 8 filters designed for the DJI Osmo Pocket 3. The set includes ND8/PL, ND16/PL, ND32/PL, ND64/PL, CPL, ND8, ND16 and ND32 filters, allowing you to reduce the amount of light entering the lens, as well as achieve advanced effects such as reducing glare on the water surface while increasing exposure time. Create breathtaking images and experiment with Freewell filters! The filters are lightweight and have a magnetic design, and they install in no time. You'll find a special case to store the filters and a cloth included.

CPL filter

The CPL polarizing filter is designed to reduce reflected light from various surfaces while ensuring color neutrality. It is lightweight and has been coated with a special coating to ensure optimal image quality. Your photos can gain even more depth and will impress with their naturalness.

ND filters

ND (Neutral Density) optical filters allow you to reduce the amount of light reaching the sensor of your camera or camcorder, without changing the color or tone of the photo. These filters are very useful when you need to increase the exposure time or increase the depth of field, but at the same time maintain the right exposure. As a result, you will get a blur of moving elements - such as water or clouds.

ND/PL optical filters

In the set you will find 4 different ND/PL filters. This is a combination of ND (Neutral Density) filter and CPL (Circular Polarizing) filter. They combine the properties of both filters, so you can get fantastic effects. They are used to reduce the amount of light and allow you to increase the exposure time. You can get the effect of blurring water or clouds in your photographs. Moreover, ND/PL allow you to reduce glare from surfaces such as water, glass, etc. Using the filters will allow you to get clearer, more natural landscape photos. ND/PL filters are available in various degrees of light reduction and polarization, allowing you to match them to specific lighting conditions and the effect you want.

Included

Filters

Case

Cleaning cloth

Manufacturer

Freewell

Model

FW-OP3-ALD

Compatibility

DJI Osmo Pocket 3

Filter type

ND8/PL, ND16/PL, ND32/PL, ND64/PL, CPL, ND8, ND16 and ND32

Optical coatings

Dustproof, scratch-resistant, oil-resistant

Price:

€ 96.00
