

Freewell Light Pollution Reduction Filter for DJI Osmo Pocket 3

Ref: 6972971865053

Freewell Light Pollution Reduction Filter for DJI Osmo Pocket 3

Freewell Light Pollution Reduction Filter for DJI Osmo Pocket 3

The LPR Freewell filter is the perfect accessory for the DJI Osmo Pocket 3 camera for anyone who wants to get the best quality when taking photos and videos at night! The filter reduces light pollution caused by artificial light emissions - a particularly useful accessory in areas with intense urban lighting. Thanks to it, you can easily capture the stars in the sky, the Milky Way or the aurora borealis! It is made with high-quality German optical glass, which is characterized by exceptional wear resistance. You can easily mount it on the lens of your camera, and thanks to the use of lightweight aluminum alloy, the filter does not affect the gimbal.
