

## Set of 4 filters Freewell Standard Day for DJI Mavic 3 Pro/C

Ref: 6972971862014

Set of 4 filters Freewell Standard Day for DJI Mavic 3 Pro/Cine

Set of 4 Freewell Standard Day filters for DJI Mavic 3 Pro/Cine

The Freewell Standard Day Set of 4 filters are an essential addition to your drone to help you achieve perfect results in all lighting conditions. They have been specifically designed for the DJI Mavic 3 Pro and DJI Mavic 3 Pro Cine, guaranteeing a perfect fit and high quality performance. They do not negatively affect the stability of the gimbal, and you will have no problem installing them.

Fantastic materials in any situation

You will find four different filters included in the kit, allowing you to adjust the brightness and contrast of the image to suit the current lighting conditions. The ND8/UV filter, ND16/ND8 filter, ND32/ND16 filter and ND64/ND32 filter allow you to reduce the amount of light reaching the camera for smooth and cinematic motion blur effects.

High quality construction

The filters are made from high-quality German optical glass. This is characterised by colour neutrality, scratch resistance and a coating that protects against water, dust and oil. So you can be sure that your filters will remain in excellent condition, whatever the conditions you are working in.
