Landing pad for drones PGYTECH 75cm (PGY-AC-308)

Ref: 6970801330795

PGYTECH drone landing mat 75cm (PGY-AC-308)

The special mat by PGYTECH is a versatile landing pad for drones. Resistant to changing weather conditions, 2-colored and durable - it will work in any situation. When folded, it is extremely compact - you can conveniently transport it in the included case and use it wherever you want.

Choose the best color

Both sides of the mat are suitable for landing. They also come in different colors - orange and blue. This is an extremely practical solution, so you can turn the product at any time so that its color contrasts better with the ground. This way you will make the landing of the drone go smoothly.

Even more convenient transportation

You will also find a special transport case in the kit. It is resistant to damage and convenient to use. It is equipped with a durable nylon handle, which makes it even easier to carry. With this practical case, transporting the product will become even easier.

Tailored to fit your drone

The diameter of the unfolded mat is as large as 75 cm, which makes it perfect for different types of drones. No matter what kind of

device you use, the PGYTECH mat will do its job perfectly. The diameter of the folded mat is only 29 cm. So the product can become extremely compact. Folding it is quick and easy. After the flight, you can easily prepare it for transport and save space in your luggage.

Reliable in any situation

The mat is made of high-quality materials that ensure its durability even in harsh conditions. It is also distinguished by its water resistance. Even the sun will not harm it - the precisely made print does not fade too quickly. You do not have to worry that your mat will cease to perform its function after just a few uses - it will serve you well for a really long time.
