

Landing Pad PGYTECH 160cm (weighted)

Landing Pad PGYTECH 160cm (weighted)

Ref: 6976100480018

PGYTECH landing pad

Keep your drone safe while landing. The PGYTECH landing mat is waterproof, so you can easily keep it clean. Thanks to the use of a steel ring, you don't have to worry about the mat flying away under a strong gust of wind. The intense color will make it easier for you to locate the landing pad's location, and the practical bag will make carrying the product even easier.

Carefully thought-out design

The PGYTECH landing pad is made of high-quality materials, which is characterized by high strength and wear resistance. It is also distinguished by its waterproof construction, so you can clean it when needed without worrying about damage. Thanks to the use of thickened 600D nylon and a durable steel ring, the landing pad weighs as much as 3.5 kg - so you don't even need an extra weight!

Convenient transportation

Take the landing pad with you on vacation and land safely almost anywhere. The kit comes with a practical bag that will make it easy for you to carry and store. It stands out for its resistance to damage and is unique in its use. What's more, it is equipped with a sturdy handle, making transportation even easier.
