

Camera Wrist Strap K&F Concept

Camera Wrist Strap K&F Concept

Ref: 6942052502474

K&F Concept Camera Wrist Strap

The K&F Concept Camera Wrist Strap is designed for the most demanding photographers. The use of nylon webbing, also used in the production of automotive seatbelts, ensures resistance to various weather conditions. Additionally, its antibacterial and anti-mold properties make it an ideal choice for photographers working in challenging environments.

Secure Buckle for Added Safety

The buckle with a lock utilizes a locking mechanism that protects the camera from accidental drops, ensuring safety for valuable equipment.

Optimized Workflow

Thanks to the D-ring, the strap offers quick access to the camera. This solution minimizes the risk of equipment damage, allowing for rapid response to changing field conditions.

Adjustable Length and High Durability

The strap's length can be adjusted from 7.5 cm to 16.5 cm, allowing for a perfect fit to individual requirements. The maximum load capacity of approximately 36 kg demonstrates exceptional durability.

Intelligent Wear Monitoring System

The built-in warning system with a color code informs about the wear level of the strap, enabling continuous monitoring of its condition and ensuring maximum equipment safety.

□Manufacturer

□K&F

□Model

□KF13.116

□Length

□From 7.5 cm to 16.5 cm

□Width

□2 cm

□Maximum Load

□Approximately 36 kg
