Tripod K&F Concept K234A0+BH-28L

Ref: 6936069297614

K&F Concept K234A0+BH-28L Tripod

The K&F Concept BI234M tripod stands out with its lightweight yet sturdy construction, allowing for easy transport. The robust ball head secures your equipment and enables smooth 360° operation, which is crucial for panoramic photography and dynamic filming. The reversible central column is a creative solution for macro photography enthusiasts, and the intuitive locking system allows for quick height adjustments. With a load capacity of up to 8 kg, this tripod can safely support even heavy, professional equipment.

Perfect for Travelers and Vloggers

The K&F Concept BI234M tripod is made from high-quality materials that are corrosion-resistant, such as magnesium alloy and aluminum. Thanks to its adjustable design, the product can be folded to a length of 390 mm, making it easy to transport in a backpack or suitcase.

360° Shots

The 28 mm ball head provides a load capacity of up to 8 kg, allowing for 360° rotational movements. This expands the capabilities of DSLR cameras when capturing panoramic shots.

Reversible Central Column for Macro Photography

The K&F Concept BI234M tripod offers a reversible central column, allowing you to get close to the ground, which is incredibly useful for macro photography.

Adjustability

The 4-section legs with a maximum diameter of 22 mm can be quickly and easily locked, allowing you to conveniently adjust the tripod's height in seconds. The height without the extended column is 11.6 cm, and with the two-section central column, it reaches 16.3 cm, making it suitable for shooting in a standing position.

Wide Compatibility

The 1/4" quick release plate fits most cameras, DSLR cameras, projectors, and telescopes. An additional holder allows you to attach a phone.
