Tripod K&F Concept K234A7+BH-28L+Universal Central axis

## K&F Concept K234A7+BH-28L Tripod

The K&F Concept K234A7+BH-28L Tripod is designed for dynamic photographers and filmmakers who need reliable equipment in the field. Its central column, which rotates 90°, opens up new possibilities for macro and product photography. The sturdy construction provides stable support for equipment weighing up to approximately 9.98 kg, which is crucial for advanced camera and lens users. You can easily adjust the product for low-angle shots, and the intuitive leg locking system ensures quick adjustment to the perfect height.

# Innovative Design and Patented Solutions

The K&F Concept K234A7+BH-28L Tripod introduces an innovative horizontal central column with the ability to rotate 90°, increasing the range of vertical movement and allowing horizontal movement, offering incredible versatility for photography, especially in product and macro photography.

#### High Load Capacity and Stability

The K&F product is incredibly durable and capable of supporting equipment with a maximum weight of approximately 9.98 kg. Thanks to the 23mm leg tubes, it ensures secure and stable support for DSLR cameras from Canon, Nikon, Sony, and others.

Versatile Recording Options

Mobilemax - Gadgets and Accessories Rua Vasco da Gama n61, 8005-411, Estoi - Faro, Portugal (Continente) Phone: +351962484153 (Call to national mobile network) Email: info@mobilemax.pt

Ref: 6936069296815

The central column of the tripod can be reversed to a low-angle position, and the ball head damping system allows easy camera positioning at various angles (vertical shots or overhead shots), which is perfect for panoramas and macro photography.

#### Wide Range of Heights

You can quickly and easily adjust the tripod's height in the range from 19.7" to 91". Additionally, the detachable monopod can be extended to a length of 84.5", providing stability and flexibility in various photographic conditions.

### Quick Leg Locking System

Thanks to the quick leg locking system, you can easily loosen or tighten the tripod legs with one hand. The locking screw is wrapped in soft rubber for comfort and to prevent slipping.
