

Filter 82 MM Blue-Coated UV K&F Concept Classic Series

Ref: 6936069208832

Filter 82 MM Blue-Coated UV K&F Concept Classic Series

Blue 82 MM HMC UV Filter K&F Concept Classic Series

Create unique shots with the K&F Concept filter. This product enhances photo quality by effectively eliminating UV light and is made of durable materials, ensuring a long-lasting use. Additionally, its installation is easy and takes only a moment.

High-Quality Photos

The filter absorbs UV radiation and effectively improves the contrast of photos and videos. Furthermore, it reduces the amount of light entering the lens and minimizes the fogging effect. It is ideal for photographing mountains or water scenes.

Robust Construction

The filter is made of Japanese optical glass, which protects the camera lens from dirt, scratches, fingerprints, and other damage. Moreover, the thin (3.3 mm) and lightweight aluminum frame effectively prevents dark vignettes when shooting wide-angle scenes.
