

Filter 1/8 Black Mist 52 MM K&F Concept Nano-X

Filter 1/8 Black Mist 52 MM K&F Concept Nano-X

Ref: 6936069274165

K&F Concept Nano-X 1/8 Black Mist 52 mm Filter

K&F Concept's 1/8 Black Mist filter is an excellent tool that will meet the expectations of both professionals and photography enthusiasts who want to achieve exceptional effects in any conditions. The accessory will allow you to give your photos and videos an unforgettable cinematic feel. It will soften skin tones, smooth out wrinkles and pores, making every portrait look unique.

Discover a new quality of portrait photography

Looking for a way to make your portrait photographs even more magical and subtle? The 1/8 Black Mist filter is the solution you need! With its help, you can easily improve the appearance of your skin, adding softness and a dazzling glow. The filter not only gently diffuses light, but also effectively mitigates any overexposure, giving your photographs a unique cinematic feel.

Highest quality workmanship

The product is made of Japanese AGC optical glass, which guarantees excellent transparency of 87%. You don't have to worry about reflections or shadows - this filter effectively eliminates them. It has also been coated with a multi-layer coating, which makes it resistant to water, scratches and oil. You can confidently use it even in harsh conditions, and any dirt will be easily removed. What's more, the extremely thin aerospace aluminum frame with a width of just 3.3 mm prevents vignetting even during wide-angle shots.
