

Electric shaver ENCHEN Steel 3S

Electric shaver ENCHEN Steel 3S

Ref: 6974728533451

The ENCHEN brand is part of the Xiaomi ecosystem.

ENCHEN Steel 3S Shaver

With the ENCHEN Steel 3S shaver you can comfortably shave or style your beard. A state-of-the-art motor is responsible for its efficient operation, while the self-grinding blades and built-in trimmer ensure greater precision. The easy-to-read display will provide you with the most important information, and the long-lasting battery guarantees a run time of up to 150 minutes. The shaver is also IPX7 waterproof, so you can shave dry or wet.

High efficiency

Enjoy optimized shaver performance. The device features 5W of power, and has been equipped with a powerful motor and an intelligent ESM system. As a result, it always works efficiently - even when the battery charge is low. The shaver is also extremely quiet - its volume level does not exceed 67dB. Also noteworthy is the anti-pinching function, which ensures that the product does not pinch or pull hair.

Working time of up to 150 minutes

The shaver also surprises with its long working time. Fully charged, it can run for up to 150 minutes! To connect it to power, use the included USB-C cable. It will only take about 2 hours to charge the device! You can also use the shaver wired - that way you don't lose the ability to shave, even if you forget to charge it.

Necessary precision

The device is equipped with self-sharpening blades, thanks to which it quickly and precisely removes even extremely short, stubborn hairs. It also does not cause irritation or cuts. The shaver also has 3 movable cutting heads that glide smoothly over the skin and adhere perfectly to the face. As a result, shaving becomes even more comfortable.

Additional trimmer

Want to make beard styling easier? Or maybe you are looking for more precision? We have excellent news for you! The shaver is equipped with an additional trimmer - if you want to use it, just press a button! With its help you can conveniently even out sideburns, mustaches and even eyebrows.

IPX7 water resistance

The shaver is also distinguished by its IPX7 water resistance. This means that you can shave not only dry, but also wet, for example with foam or gel. It is also possible to clean the head of the device under running water. This way you will keep it in good condition for longer and avoid the growth of bacteria and, consequently, skin problems.

Take it on vacation

Are you facing a trip of several days? You don't have to give up the ability to even out or shave your beard! The Steel 3S shaver is incredibly lightweight and portable - you can easily find a place for it in your travel bag. The device also has a special smart lock, so you can avoid its accidental activation during transport.

Comfort of use

Shaving has never been easier. The shaver fits perfectly in your hand and is very comfortable to use. It is made of high-quality ABS and PC plastics, making it extremely durable and resistant to wear and tear. It also has a built-in display that, among other things, will allow you to quickly check the percentage of battery charge. It will also remind you when the device needs to be cleaned.
