Teclast T50Pro 11" Gray Tablet

Teclast T50Pro is a tablet that effortlessly combines modern technology with exceptional design. Its 11-inch screen, octa-core MediaTek Helio G99 processor, and advanced Mali-G72 MP3 800MHz graphics card make it an ideal device for demanding users. Additionally, its 8GB RAM and expandable internal memory up to 1TB ensure smooth operation and ample space for data.

11-Inch Full HD Display

Teclast T50Pro features an impressive 11-inch IPS TDDI fully laminated display offering a resolution of 2000 x 1200 pixels. Its 120Hz refresh rate ensures smooth visuals, which is crucial for watching movies or playing games. The slim 8-millimeter-wide bezels add elegance and increase workspace.

Processor and Graphics Performance

The heart of Teclast T50Pro is the octa-core MediaTek Helio G99 processor, supported by the Mali-G72 MP3 800MHz graphics card. This configuration provides high performance necessary for gaming or working with photo and video editing applications. Helio G99, manufactured using 6nm technology, combines two powerful A76 cores clocked at 2.2 GHz with six efficient A55 cores, resulting in a benchmark score of 400,000 on AnTuTu.

Android 13: Personalization, Security, and Smoothness

Android 13, installed on Teclast T50Pro, opens the door to a world of almost limitless customization options and increased security. Users can customize applications and multimedia player to their preferences by changing colors, themes, and language. Android 13 also emphasizes privacy and security, enhancing control over applications and protecting user's photos, videos, and clipboard content. This includes parental control. With updated taskbar and improved split-screen multitasking, Android 13 becomes more intuitive and smooth.

Expanded Memory and Data Storage

The device offers 8GB of RAM, significantly affecting system and application speed, with the possibility of expanding it by another 8GB. Additionally, 256GB of internal UFS 2.2 memory with expandable capability up to 1TB via Micro SD card provides ample space for files and data.

Audio and Video

Teclast T50Pro is equipped with four speakers using the fourth-generation SWEET system, delivering immersive 3W sound experiences. Additionally, the tablet features an 8MP front camera and a 20MP Sony rear camera with autofocus and an additional AI camera for scene recognition, making it great for various conditions. Additionally, the device has an eye protection mode, a mode tailored to the keyboard, reading, and screen splitting, allowing for both entertainment and work.

Connectivity and Navigation

Teclast T50Pro supports 4G LTE, AC standard WiFi, Bluetooth 5.2, providing fast and stable internet connection. The tablet supports 4 positioning systems: Beidou, GPS, GLONASS, and GALILEO, ensuring precise navigation. The tablet also supports TDD+FDD 4G networks in two modes, faster and more compatible dual-band AC WiFi access, and VoLTE, allowing simultaneous calling and connecting to fast internet. Additionally, Networking Engine 2.0 technology reduces network response latency, and Bluetooth 5.2 provides high-quality audio. Data download speed is up to 600Mbps, and data upload speed is up to 150Mbps.

Elegance in Simple Form

The tablet features a simple, minimalist design with straight edges rounded at the corners. The cameras and LED are symmetrically placed in line in the upper left corner. The black bezels surrounding the screen are only 8mm thick, allowing for comfortable work and immersion during play.

Brand Teclast

Model T50Pro

Size 11 inches

Type IPS, TDDI, fully laminated

Resolution 2000 x 1200, 2K Full HD

Refresh Rate 120Hz

Processor MediaTek Helio G99

Graphics Card Mali-G72 MP3 800MHz

Bezel Width 8mm

Battery Capacity 8000 mAh

Video Playback/Browsing Time 8h

Fast Charging Yes

Connectivity WiFi, 4G LTE, Bluetooth 5.2

RAM Cache Memory 8GB LPDDR4X, expandable up to 16GB

Internal Memory UFS 2.2 256GB

Micro SD Slot Yes, up to 1TB

Weight 480g

Thickness 7.5mm

Price:

€ 286.00
