Tablet Teclast P85T 8" 4/256 GB 2,4+5G WiFi Green

Ref: 6940709685655

### Teclast P85T Green 8" Tablet

The Teclast P85T tablet stands out from the competition with its versatility and remarkable color. It's perfect for users looking for a compact device with advanced features. Its metal casing with a green shade that changes depending on the light gives it an interesting and refreshing look. The Allwinner A523 processor with eight cores and Mali-G57 graphics processor ensures smooth operation of applications, even those with AR and VR capabilities. Additionally, the tablet offers the possibility to expand the RAM to 8GB, which is a significant advantage for users needing more space for their data.

### Processor Performance

The Teclast P85T is equipped with an Allwinner A523 processor with eight A55 cores clocked at 1.8GHz. This guarantees high performance when using applications, games, and browsing the internet. Users can expect smooth and fast system operation, which is crucial for everyday use.

### Graphics and Realism

Thanks to the Mali-G57 graphics processor based on the Valhall architecture, the tablet excels in handling 3D graphics and applications utilizing augmented and virtual reality (AR & VR). This feature makes it ideal for enthusiasts of modern technologies and gaming.

### RAM and Internal Memory

The Teclast P85T comes with 4GB of LPDDR4X RAM, expandable to 8GB, providing users with flexibility in managing resources and increasing performance, especially for more demanding tasks. The internal memory has a capacity of 256GB, which can be expanded to 1TB using a microSD card slot.

### Connectivity and Communication

The tablet supports both 2.4G and 5G WiFi, ensuring fast and stable internet connectivity. Bluetooth 5.2 with AAC and LDAC codecs is another advantage, allowing seamless cooperation with various wireless devices.

### Durable Battery

The 5000mAh battery allows users to use the tablet for an extended period without the need for frequent charging. For example, it offers 5.5 hours of internet browsing, 7 hours of video playback, or 10 hours of e-book reading, which is a significant benefit for frequent travelers.
