Tablet Teclast M50HD 10.1" 8/128 GB 2.4+5G WIFI Blue

Teclast M50HD Blue 10.1 Tablet

Modernity, functionality, and style come together in the Teclast M50HD tablet, providing an unparalleled user experience. This slim, efficient, and elegant tablet offers advanced features such as VoLTE support, high-quality audio, and a convenient split-screen mode, perfect for professionals, students, and parents. Its durable metal casing, powerful processor, and expandable memory up to 16GB make it the perfect device for anyone looking for quality hardware.

Ultrathin Design and Metal Casing

The Teclast M50HD tablet stands out with its elegant, metal casing in a calming shade of blue, featuring clean edges and rounded corners. Its thickness is only 7.8mm, making it incredibly lightweight and comfortable to use. This aesthetically pleasing and durable construction not only makes the tablet visually attractive but also resistant to daily use.

Advanced Connectivity: Dual 4G and Wi-Fi

Dual 4G (FDD + TDD) and VoLTE support provide reliable connectivity and fast internet access wherever you are. The tablet also supports both 2.4G and 5G Wi-Fi standards, offering a stable connection and high data transmission speeds. It's the perfect solution for people always on the move.

Performance and Memory Expandability

With the Unisoc T606 processor and Mali-G57 graphics processor, the tablet delivers smooth performance and excellent graphics. It comes with 8GB of RAM as standard, with the option to expand it to 16GB, and 128GB of internal memory expandable up to 1TB, making the Teclast M50HD an ideal tool for storing and managing large amounts of data.

High-Quality Display and Audio

The tablet features a fully laminated TDDI display with a 10.1-inch diagonal and a resolution of 1920 x 1200, with a refresh rate of 120Hz, ensuring a clear and smooth image. The Momentum III audio system, combined with the Smart K amplifier, provides crystal-clear sound that enhances the experience of watching movies, gaming, or listening to music.

Safety and Convenience

Options such as parental control, facial recognition unlocking, and split-screen mode enhance security and user convenience. Parental control allows for managing screen time for children, while facial recognition enhances data security. The split-screen mode enables efficient work and multitasking.
