Ref: 6953460596306

Wireless mechanical keyboard Motospeed GK82 2.4G

### Motospeed GK82 mechanical keyboard

Motospeed GK82 is a compact keyboard that does not have a number block. Its small size makes it extremely handy and portable, so you can take it with you almost anywhere. It has 87 keys with blue switches and supports anti-ghosting. You can connect it both wired and wirelessly for even more freedom. LED backlighting with 6 available modes gives it a unique gaming character.

### Built for gamers

Blue switches provide fast response and are surprisingly quiet. High-end mechanical axes stand out for their durability and let you enjoy smooth operation. The GK82 keys are also very easy to clean. The keyboard also features anti-ghosting technology and N-key rollover, which means you can press multiple keys simultaneously and perform complex combinations in-game without worry. Every keystroke will be correctly registered!

### Connect it however you want

The keyboard can be connected to your computer with a USB cable or wirelessly. This creates almost unlimited possibilities. Take advantage of the 2.4G connection to enjoy the freedom of your dreams while gaming. The fast and stable transmission with a range of up to 10m is sure to meet your expectations. And if you want total reliability or want to conveniently charge your device, use a USB cable.

#### Long runtime

GK82 is equipped with a 1300mAh battery that will surprise you with its performance. Thanks to it, the keyboard can work up to 500 hours on a single charge (with the backlight off). The device also has an advanced security system that effectively protects it from damage. So charging the keyboard is completely safe.

#### True gaming character

The keyboard features a unique e-sports design. Thanks to its ergonomic design, it does not strain your wrists and guarantees exceptional comfort of use. There are also 12 function keys and the possibility to lock the Windows key. Moreover, the blue LED backlighting gives the device a fantastic gaming character. You can also choose from 6 backlight modes - you will surely find something for yourself.

#### Durability

The device was made from high-grade materials such as aluminum alloy, for example. Thanks to this it is distinguished by increased strength and resistance to wear. In addition, the life of the keyboard buttons oscillates around 50,000,000 clicks, which makes it incredibly durable. No matter how often you play or how dynamic your games are, you can enjoy the functionality of GK82 for a long time.
