Vibrating Massager KiCA K2 (Navy Blue)

Treat yourself to the luxury of a massage anywhere and at any time. The KiCA K2 massager is made of aircraft-grade aluminum, making it lightweight and easy to fit into any bag. The device provides up to 11 hours of operation on a single charge. It also offers 4 speed levels, with a maximum of 3200 rpm, allowing you to customize it to your current needs and enjoy both relaxation and muscle recovery. The package also includes 4 heads, including 2 magnetic ones known for their pain-relieving properties and significant improvement in blood circulation.

4 Speed Levels

Experience your dream relaxation and recovery by choosing from 4 speeds ranging from 1200 to 3200 rpm. The KiCA K2 massager provides a deep 6mm muscle massage that effectively relieves tension and facilitates relaxation. You can also use the Physical therapy mode, in which the speed is automatically adjusted. Despite its high performance, the device does not generate annoying noise.

Massage for Different Muscle Groups

The package includes 4 interchangeable heads, including a spherical one that you can use for muscle tissue relaxation and a U-shaped one that is suitable for the neck and tendons. You will also have magnetic tips at your disposal - a conical one for intense acupuncture point and joint massage, and a flat one that allows for massaging large, flat muscle groups, especially on the back. You no longer need to

rely on professional services to provide yourself with biological rejuvenation and a moment of relaxation.

Ready for Any Challenge

The KiCA K2 massager is equipped with a 2000mAh battery that provides up to 11 hours of operation (if you use the flat head and the device operates at the lowest speed level). The package includes a USB-C cable, which allows you to recharge it in about 2.5 hours.

Enjoy Massage Anywhere

Don't give up on massage, no matter where you are at any given moment. The KiCA K2 massager weighs less than a water bottle (485g) and is roughly the size of a smartphone. As a result, you can conveniently take it with you to the office, the gym, or on a trip, allowing you to enjoy a feeling of relief and relaxation at any time.

Intelligent Solutions for Your Health

KiCA cares about your health, which is why the massager automatically turns off after 10 minutes of continuous massage, ensuring an optimal experience. This feature prevents excessive muscle stimulation and protects the device from overheating. Thanks to this, using the K2 is completely safe.

Attention to Detail

The device is made of aircraft-grade aluminum, making it exceptionally durable despite its lightweight. Its body, shaped like the letter T, is covered with a matte texture, which significantly increases usability and allows for a secure grip. With KiCA, you can always enjoy the desired comfort!
