

UV Filter PolarPro for iPhone 15 (IP15-UV)

UV Filter PolarPro for iPhone 15 (IP15-UV)

Ref: 817465029909

PolarPro UV filter for iPhone 15 (IP15-UV)

Enjoy high-quality photos with the UV filter. The product effectively eliminates ultraviolet light and improves the sharpness and contrast of your photos. It is made of German glass, provides high light transmission and protects the lens from scratches.

Robust workmanship

The UV filter is dedicated to the iPhone 15 and fits into the LiteChaserPro series case. The German CinemaSeries glass guarantees a light transmission of 99.9% and 16 optical coatings prevent scratches and greasy marks. The filter frame, on the other hand, was created from aerospace aluminium, and its low weight will not affect the use of your smartphone. So you can create clear shots and protect your iPhone lens from damage at the same time.

Quick and easy installation

Mounting and removing the filter will only take a few seconds - just press the dedicated button. You can remove the filter at any time if you don't need it temporarily, or instantly apply it to your iPhone lens for razor-sharp images.
