

CP Filter PolarPro for iPhone 15 (CP15-UV)

CP Filter PolarPro for iPhone 15 (CP15-UV)

Ref: 817465029916

PolarPro CP filter for iPhone 15 (IP15-CP)

Enjoy high-quality photos with the CP filter. The product effectively adds depth to your photos, reduces glare, reflections and haze. To adjust the polarising effect, rotate the filter. In addition, the product is made of high-quality German glass and will only take a moment to install.

Robust workmanship

The CP filter is dedicated to the iPhone 15 and fits into the LiteChaserPro series case. It was created from German CinemaSeries glass, and 16 optical coatings prevent scratches and greasy marks. The lightweight aerospace aluminium filter frame, on the other hand, does not weigh down the device, so you can use your iPhone comfortably.

Quick and easy installation

Installing and removing the filter will only take a few seconds - just press the dedicated button. You can remove the filter at any time if you don't need it temporarily, or instantly apply it to your iPhone lens for razor-sharp images.
