Mini Projector BlitzWolf, BW-VT2 , Android, Wi-Fi, 1080p

Ref: 5905316140745

Blitzwolf BW-VT2 Projector (EU)

Love cinema? Now you can have a private cinema in your home! The compact Blitzwolf BW-VT2 projector can display 1080p movies and supports 2.4G/5G wireless connection. With several available ports, it is compatible with a wide variety of devices. The DLP technology provides excellent picture quality and the built-in 3W speaker allows you to use it as a music player. The projector is also incredibly lightweight and portable.

Fantastic image quality

Enjoy superb picture quality when you watch your favorite series and more. The projector supports DLP technology, which provides incredible rich detail and crisp, natural colors. This allows the product to offer you an almost cinematic experience. What's more, the device uses reflected light to let you watch movies comfortably without eye fatigue or risk of eye damage.

Wide compatibility

Fear of hardware compatibility issues? Don't be! The projector is equipped with several ports, such as USB 2.0 and HDMI, which allow you to connect different types of devices. The product works perfectly with such devices as laptops, digital cameras, DVD players, smartphones, tablets and even the PS3 or PS4 consoles. Connect your equipment to the projector and watch your favorite movies in perfect quality!

Free yourself from cables

Now you can project movies even more conveniently. The projector has Android 9.0 built-in, which among other things provides easy access to streaming apps. It also supports 5G WiFi connection, which guarantees fast, stable and reliable transmission without any delays. However, this is not the end of the surprises! The product allows you to wirelessly display images from phones that support screen cloning.

Crystal clear sound

Fantastic picture is not everything - sound quality also counts. The projector is equipped with a 3W speaker that delivers crystal clear sound. So you can immerse yourself in the movie story and experience unforgettable emotions. The device supports reliable Bluetooth 4.2 connectivity, so you can also use it as a wireless speaker.

Customize the displayed image to your needs

Adjust the projector settings to suit your preferences or room conditions. The projected image size can range from 40 to even 300 inches. The range of the device is 0.5-8m. All this makes the projector ideal for both small and larger rooms. The product also supports automatic horizontal keystone correction and allows you to adjust it to $\pm 40^\circ$ vertically.

The projector you need

Get yourself a projector that will serve you well for a long time. The BW-VT2 is incredibly lightweight and portable - its small size means you can take it with you almost anywhere. The lens is made of high grade materials and is extremely durable and abrasion resistant. It is extremely durable and provides a bright, stable image. Thanks to the life of the LED at 10000h you do not have to worry that the projector will refuse you service too soon.

Also works wirelessly

What else makes the Blitzwolf projector perfect not only at home, but also outside the home? The ability to work wirelessly! The device is equipped with a durable battery with a capacity of 4000 mAh. Fully charged it can work up to 1.5 h! This is enough to watch several episodes of a TV series or a short movie. Note: the projector only works with the original power adapter. It does not support phone power adapters.

User-friendly

The projector's immense capabilities go hand in hand with its childlike operation. On the top panel of the device, you'll find a convenient-to-use touch panel that provides greater smoothness and comfort than standard buttons. It also comes with a handy remote control that makes using the device even easier. You no longer have to move from your chair or couch every time!
