

Flashlight Superfire A2, 650lm, USB

Flashlight Superfire A2, 650lm, USB

Ref: 6956362901162

Mini torch with zoom

The Superfire A2 is a compact torch, using the high quality SST-40-W LED. It will fit into a pocket, backpack, handbag or even a satchet and, thanks to its splash resistance, it will perform in all conditions and unforeseen situations. The torch is made of high-strength aerospace aluminium, characterised by high resistance to damage and wear.

Quick micro USB charging

The flashlight is powered by a single 18650 battery, and you can quickly and conveniently renew its energy using the micro USB port. Note: the battery has been permanently built into the device and is not replaceable. When using the flashlight, the LED backlight will inform you about the charging status: green color means that the battery charge level is sufficient; red color indicates that the battery needs to be recharged.

High power

The torch shines with a brightness of 650 lumens at 10 watts, provides a strong light and has a long life, so you don't have to worry about frequently replacing the LED. The torch has 5 light modes. 3 modes are used to control the brightness (strong, medium, weak) and the other two are used to activate the strobe light or SOS. The torch switch is used to switch between modes.

Additional features

The Superfire A2 torch has the ability to focus the beam by extending the torch head, so you will see the illuminated area very accurately. The intelligent battery will let you know when the battery is running low and will also cut power if the battery voltage is too low, preventing damage to the battery. The splash resistance allows you to use the torch in all conditions.

Kit contents

Torch

USB cable

Producer

Superfire

Model

A2

Light source

SST-40-W

Rated power

10W

Operating time

2 hours

Number of lumens

650

Drop resistance

up to 1m

Dimensions

125 x 28 x 26 mm

Weight

85g

Waterproof

IP34

Illumination range

200 m

Battery capacity

2000mAh

Modes

strong - medium - weak - stroboscopic - SOS

Material

aircraft-grade aluminium 6061-T6

Charging time

3 hours
