

Multifunction Flashlight SuperFire G20, 470lm, USB

Multifunction Flashlight SuperFire G20, 470lm, USB

Ref: 6956362932975

Superfire G20 flashlight

The Superfire G20 flashlight, despite its small size, surprises with its great capabilities. In addition to the usual illumination, it also offers a red laser, and thanks to its IP44 water resistance, you can use it in almost any conditions without worry. The device can work for up to 3-6 hours on a single charge, and if necessary, you will also use it as a practical powerbank. Using the flashlight is facilitated by practical elements such as a special clip, hook and magnetic base.

2 light sources in 1 device

The flashlight emits light both from above and from the side. Its intensity you can freely adjust to your expectations. What's more, the side light is characterized by a high color rendering index (CRI), which in this case is as high as 90+. Thanks to this, you will not only see everything clearly, but also enjoy a true richness of colors.

Also helpful during speeches

The flashlight is also equipped with a red laser. So you will successfully use it not only as a source of illumination, but also as a practical indicator. Do you give lectures, trainings or presentations? Such a handy accessory is sure to come in handy - with its help you will make any speech more attractive and show your audience everything they need to pay attention to.

2 intuitive buttons

The flashlight has only 2 buttons, which makes its operation fabulously easy. With the help of the one above, you will conveniently turn on the laser pointer. The one below is used to turn on the regular light. By pressing it, you can also quickly adjust the brightness of the lighting. That's all you need to take advantage of the Superfire G20's unique capabilities!

It will also work well as an emergency powerbank

You will charge the flashlight's lithium battery with the help of a USB cable. After one charge, the device can operate for 3 to 6 hours. That's not all! Superfire G20 provides not only illumination - it will also work perfectly as a powerbank. You no longer have to worry that your smartphone will refuse to serve you at the least opportune moment - with the help of the flashlight you can conveniently charge it.

Reliable even in the rain

IP44 rating means that you can use the G20 also in extremely adverse conditions. It is not intimidated by downpours or splashing. You can use it in almost any situation without worry. Changeable weather or particularly challenging terrain - this functional Superfire flashlight will give you the illumination you need and will certainly not let you down.

Practical design elements

When designing the flashlight, care was also taken to equip it with a number of practical features. At the base of the G20 is a strong magnet, which allows you to stably attach the device to a metal surface of your choice. This way you can conveniently illuminate the interior of your car, for example. The flashlight also has a special clip, with the help of which you can attach it to your clothes or backpack and free your hands. In addition, a practical hook allows you to hang the Superfire G20 anywhere.

Unparalleled comfort of use

Made of aluminum alloy, the device's casing is characterized by extraordinary strength and wear resistance. It also surprises with its pleasant-to-the-touch texture, thanks to which the G20 fits perfectly in the hand and does not slip out of it. The comfort of the flashlight is also guaranteed by its light weight of 220 g, compact size and slightly flattened shape. All this makes the device delightfully handy - you can always have it with you.
