### Deerma LD612 Ultrasonic Air Humidifier

The Deerma LD612 Air Humidifier is an innovative device that combines elegant design, advanced technology, and user convenience. Its slim and elegant build makes it suitable for any interior, and the durable ABS material ensures long-lasting use without worries of damage. LD612 offers intuitive operation with a large display and remote control, allowing for easy control of the room's humidity level. Additionally, the intelligent continuous humidification system, 6-liter capacity, and the ability to adjust the mist volume to individual needs make LD612 the perfect solution for ensuring optimal comfort at home or in the office.

### Intelligent Humidification System

The Deerma LD612 humidifier is equipped with an intelligent continuous humidification system that automatically adjusts the humidity level and temperature to the calculated level to avoid excessive moisture and dryness. Users can also set the level manually. The device allows setting a constant humidity level ranging from 45% to 90%, which is particularly useful in various weather conditions.

### Remote Control and Display

LD612 offers convenient remote control using the included remote, which can be magnetically attached to the device to prevent it from getting lost. The large display provides real-time information on humidity levels and the device's status, making it easy to operate.

#### Durable and Safe Construction

Made from durable ABS material, the humidifier is resistant to mechanical damage and scratches, ensuring its longevity. The device also has overheating protection. The water level is continuously monitored, and when it becomes too low, the device will automatically shut off to allow the user to sleep peacefully. The humidifier housing includes a transparent panel for monitoring the water level in real time.

#### Quiet Operation and Versatility

The Deerma LD612 operates extremely quietly (38 dB), making it ideal even for bedrooms. Additionally, the humidifier allows the addition of essential oils, enabling the creation of a personalized aromatherapy session in the comfort of your own home. Thanks to the high design of the humidifier, the mist does not settle on the floor. The air inlet is protected by a dust-resistant sponge that blocks contaminants.

#### Capacity and Efficiency

With a 6-liter water tank capacity and a mist output of 280 ml/h, LD612 provides long-lasting humidification without the need for frequent water refills. This is an ideal solution for ensuring comfort in larger rooms. Moreover, users can choose the mist volume from three levels. A 6-liter water capacity translates to continuous air humidification for 21 hours.

#### Included in the Package

- Humidifier
- User Manual
- Remote Control
