Havit H2042d-B gaming headphones

If you're looking for headphones that combine sound quality, comfort and gaming design, the Havit H2042d-B will be an ideal choice. Equipped with 50-millimeter drivers, they will let you hear even the finest details of sound. The omni-directional microphone allows you to communicate freely with other players, and the dynamic RGB backlighting will create a unique atmosphere during gaming.

Immerse yourself in the world of gaming

Get ready for sound that will literally transport you to the world of gaming! The Havit H2042d-B features powerful 50mm drivers that will deliver you sound in incredible quality. Every detail, from subtle ambient sounds to powerful explosions, will be rendered in the finest nuances, providing you with a unique sound experience.

Stay in touch with other players

Ready to conquer the virtual world? Turn on the microphone and make yourself heard! Havit headphones are equipped with an omni-directional microphone that perfectly eliminates ambient sound interference, focusing solely on your voice. Now you can perfectly communicate with other players, plan strategies and command your team, achieving maximum efficiency in any game.

Designed for your comfort

The ergonomic design of the headphones was created for hours of gaming marathons. The soft memory sponge earcups perfectly conform to the shape of your ears, eliminating discomfort and fatigue. Thanks to their adjustable size, you can easily adjust them to your needs for maximum comfort during any game.
