Smart thermostat Avatto WT410-16A-W electric heating 16A WiFi

Avatto WT410-16A-W Smart Thermostat for Electric Heating 16A WiFi

Manage the temperature in your home in a modern way. The Avatto WT410-16A-W Smart Thermostat is designed for controlling electric heating with a maximum load of 16A. With Wi-Fi connectivity, you can remotely control the temperature through an app. The product also works with popular voice assistants and allows you to create schedules and integrate with other smart devices. Choose innovative solutions and save on electricity bills while enjoying comfort and warmth!

Create the Perfect Conditions

The Avatto thermostat offers advanced weekly programming options, allowing you to set different temperatures for 6 time periods on weekdays and 2 time periods on weekends. It's an ideal solution for families who want to adjust the temperature to their current needs. The adjustable brightness of the HD LED screen provides extra comfort, especially at night when sleep could be disturbed. There is also an option to completely turn off the lighting.

Precision for Comfort and Savings

The high precision of the Avatto thermostat settings, with an accuracy of up to 0.5°C, ensures the perfect temperature in your home, leading to comfort and energy savings. The device displays the room temperature with an accuracy of 0.1°C. It also offers a hysteresis function, allowing you to control the temperature range from 0.5°C to 10°C.

Effortless Mode Change

The thermostat supports 4 operating modes, including Manual, Programming, Programming Temporary, and Leave, allowing you to efficiently adjust the temperature to changing needs, which is especially useful in emergencies, such as unexpected guests arriving.

Control from Anywhere

With compatibility with the Smart Life and Tuya Smart apps, the Avatto thermostat allows you to control the temperature in your home from anywhere, which will be greatly appreciated by busy individuals who spend a lot of time away from home. There is also the option to manage the device using voice commands. The product is compatible with Amazon Alexa, Google Home, and Yandex Alice, allowing you to relax on the couch and adjust the temperature settings without getting up while at home. Prefer more traditional solutions? Use the touch panel!

Perfect Choice for Families

The thermostat sharing feature allows multiple people in the household to manage it, allowing the whole family to collectively care for home comfort. Additionally, child lock eliminates the risk of accidental changes to settings - you don't have to worry about your little one making unwanted adjustments to the device's operation!

Create a Smart Home

Connect the thermostat to other smart devices to create scenes tailored to specific situations - from returning home to bedtime. Furthermore, there is the option for group control of thermostats in different rooms, providing extra convenience.
