Smart thermostat Avatto WT410-BH-3A-W Gas Boiler 3A WiFi

Avatto WT410-BH-3A-W Intelligent Boiler Thermostat with 3A WiFi

Manage your home's water temperature in a modern way with the Avatto WT410-BH-3A-W Intelligent Thermostat, designed to control boilers with a maximum load of 3A. Thanks to its Wi-Fi connectivity, you can remotely adjust the temperature using a mobile application. This product also works seamlessly with popular voice assistants and offers scheduling and integration capabilities with other smart devices. Embrace innovative solutions and reduce your electricity bills while enjoying the convenience and availability of hot water!

Create the Ideal Conditions

The Avatto thermostat provides advanced weekly programming options, allowing you to set different temperatures for 6 time periods on weekdays and 2 time periods on weekends. This is an ideal solution for families who want to customize the water temperature to meet their current requirements. You can also adjust the brightness of the HD LED screen for added comfort, especially at night when sleep could be disrupted. There is even an option to completely turn off the display lighting.

Precision for Comfort and Savings

The high precision of the Avatto thermostat settings, with accuracy up to 0.5°C, ensures the perfect water temperature, resulting in both comfort and energy savings. The device displays the temperature with an accuracy of 0.1°C and offers a hysteresis function that allows you to control the temperature range from 0.5°C to 10°C.

Effortless Mode Change

The thermostat supports 4 operating modes, including Manual, Programming, Programming Temporary, and Leave, allowing you to efficiently adjust the water temperature to changing needs.

Control from Anywhere

Thanks to its compatibility with the Smart Life and Tuya Smart apps, the Avatto thermostat allows you to control the water temperature from anywhere, which will be greatly appreciated by busy individuals who spend a lot of time away from home. There is also the option to manage the device using voice commands. The product is compatible with Amazon Alexa, Google Home, and Yandex Alice, allowing you to relax on the couch and adjust the temperature settings without getting up while at home. Prefer more traditional solutions? Use the touch panel!

Perfect Choice for Families

The thermostat sharing feature allows different people in the household to manage it, enabling the entire family to collectively take care of home comfort. Additionally, the child lock eliminates the risk of accidental changes to settings - you don't have to worry about your child making unwanted adjustments to the device's operation!

Create a Smart Home

Connect the thermostat to other smart devices to create scenes tailored to specific circumstances and enjoy a relaxing bath at your chosen time. Furthermore, there is the option for group control of thermostats in different rooms, providing extra convenience.
