

Jya Fjord Pro Air Purifier

Jya Fjord Pro Air Purifier

Ref: 6972722650365

Intelligent Evaporative Air Purifier Jya Fjord Pro Air Purifier

Jya Fjord Pro is a high-performance intelligent evaporative air purifier that delivers 550m³ of air per hour, allowing for air purification in a room ranging from 409 m² to 710 m². Using a HEPA H13 filter and an activated carbon layer, it effectively removes pet hair, pollen, odors, household chemical vapors, dust, and viruses, ensuring the health of people in the room. It requires little maintenance - the filter only needs replacing every three months. The device has quality sensors monitoring PM2.5, PM10, TVOC (total volatile organic compounds) particles, as well as temperature and humidity at home, allowing the user to learn important information about their environment. Fjord Pro is compatible with Amazon Alexa, Google Assistant, and Apple HomeKit for remote control. Its sleek silver casing also makes it an attractive home decoration.

Purification Efficiency and Range

The Jya Fjord Pro effectively purifies air in an impressive space from 409 m² to 710 m², delivering 550m³ of clean air per hour. This makes the device an ideal solution for larger homes or office spaces where air quality is crucial for comfort and health. In addition, the sleek silver casing makes the Jya Fjord Pro not only functional but also an aesthetic interior element.

Intelligent Air Quality Control

The integration of advanced sensors, which monitor PM2.5, PM10, TVOC particles, as well as humidity and temperature, makes the Jya

Fjord Pro not just a purifier, but also an intelligent air quality control center. With precise measurements, the user gets full access to information about the indoor environment's condition, which can inform conscious decisions regarding conditions in their home or office. This feature is especially useful for allergy sufferers and those sensitive to changing weather conditions.

Smart Home Integration

Compatibility with systems such as Amazon Alexa, Google Assistant, and Apple HomeKit means that the Jya Fjord Pro can be easily integrated into the user's smart home ecosystem. Remote control and access to data about air quality and device status make managing purification extremely comfortable and intuitive. This functionality allows the user to tailor the device's operation to individual needs, even when away from home.

Advanced Air Purification

Using HEPA H13 filtration technology and an activated carbon layer, the Jya Fjord Pro effectively eliminates a range of pollutants such as pet hair, pollen, dust, viruses, and household chemical vapors. In practice, this means delivering significantly cleaner air to your surroundings. HEPA filtration is a renowned and appreciated technology capable of capturing even the smallest particles, ensuring that the air you breathe is considerably healthier.

Simple Maintenance

One of the advantages of the Fjord Pro model is its minimal maintenance. Replacing the filter every three months is the only task the user needs to perform to keep the device in excellent condition. This process is quick and intuitive, meaning even those unfamiliar with such devices can easily care for the purifier. Proper maintenance ensures that the Fjord Pro will operate efficiently for a long time, delivering high-quality air to your surroundings.
