Smart Visual Ear-Clean Rod Bebird R1 white

Bebird R1 Ear Cleaning Oscope with Camera (White)

Ensure complete safety while thoroughly cleaning your ears. The Bebird R1 otoscope is equipped with an endoscopic camera that utilizes a CMOS sensor and supports 8 MP HD resolution. With the dedicated Bebird app, you can safely view the inside of your ear canal to avoid damaging it during maintenance. The Wi-Fi chip ensures a stable connection, and the silicone tip guarantees safe usage. Additionally, the LED illumination makes routine cleaning easier. The kit includes various accessories to enhance the device's functionality.

Inside Ear Canal View

Step into the era of modern ear care and take care of your ears with Bebird. The R1 otoscope is equipped with a camera that supports HD resolution of 800 W, resulting in high-quality images. This allows you to thoroughly analyze the inside of your ear canal and precisely remove earwax without the risk of damage. The dedicated Bebird app, available on the App Store and Google Play, provides real-time viewing of the camera's image. With a high-quality Wi-Fi chip, the connection is always stable, and the cleaning process is uninterrupted. Additionally, the 6-axis gyroscope ensures reliable image stabilization, and the 20 fps speed allows for smooth monitoring of the ear canal's interior.

LED Illumination

The Bebird R1 otoscope offers shadowless LED lighting equipped with 6 diodes, providing cool light. This allows you to comfortably

explore the inside of your ear and ensures that no part is missed during cleaning. The illumination, combined with the high-quality camera, also enables examination of the smallest details and structures inside the ear.

Safe Usage

The included ear spoon is made of soft and skin-friendly silicone that meets rigorous food-grade requirements. The rounded Q-shaped design makes ear cleaning easy and safe. Moreover, the anti-slip structure of the device eliminates the risk of hand slipping and causing ear injuries. The kit also includes practical, replaceable accessories, allowing the Bebird R1 otoscope to be used hygienically by multiple people.

Efficient Battery

With a 180 mAh battery, the Bebird R1 otoscope can operate for 70 minutes on a single charge. The charging time is only one hour. As a result, you can enjoy comprehensive ear care without the need for frequent device recharging.

Included in the Kit:

Otoscope with Camera

Ear Spoon

Cotton Swab

Charging Cable

Storage Tube

□Manufacturer

□Bebird

□Model

□R1

□Pixels

□8 Megapixels

□3.5 mm

□Optimal Focal Length

□12 ~ 15 mm

□Gyroscope

□6-axis

□Image Transmission Speed

□20 frames per second

□Image Sensor

□CMOS

□Operating Frequency

□2.4 GHz

□Network Standard

□IEEE 802.11b/g/n

□Battery Capacity

□180 mAh

□Operating Time

□Approximately 70 minutes

□Charging Time

□Approximately 60 minutes

□Operating Temperature

□From -10 to 45°C

□Input Parameters

□DC5V 0.5A
□Ear Spoon Weight
□13 g
□Color
□White
