Deli Tools Axe EDL5708

Deli Tools EDL5708 axe will prove useful in many workshops and workshops. It allows you to chop wood efficiently, you can also use it to prepare wood for the fireplace. The non-slip fiberglass handle allows you to work comfortably, and a special blade guard will help you avoid injury. The axe head is made of high-quality steel and weighs 600g.

Comfort of use

Using the axe is extremely comfortable. The ergonomic shape and optimal balance ensure comfort even during prolonged work. The fiberglass handle fits perfectly in the hands, and thanks to the non-slip TPR plastic parts, it guarantees a secure grip. The axe also has a blade guard, so you don't have to worry about cutting yourself. There is also a small hole in the handle, which allows you to hang the tool in the desired place in the workshop.

High quality workmanship

The highest quality materials were used to make the axe. As a result, the tool is extremely durable, not prone to damage and resistant to wear. It will serve you perfectly for a long time. Durable, solid head made of steel allows you to cut quickly and effectively - a great choice for any workshop.
