

Filter for Smartmi Rainforest Humidifier

Filter for Smartmi Rainforest Humidifier

Ref: 6970403202520

Smartmi Rainforest Humidifier evaporative humidifier filter.

Smartmi Rainforest Humidifier filter is a guarantee of clean, healthy air in your home! Its thoughtful design prevents mold, unpleasant odors, and effectively inhibits the growth of bacteria. Keeping the filter in excellent condition is extremely easy - you can easily remove it and wash it under running water, which will further prolong its life.

Double humidifying power

The Smartmi filter works extremely effectively thanks to an innovative solution. It is placed above the water tank, where it absorbs falling water droplets, creating the first humidifying layer. As air enters the device, it passes through this layer, allowing for double humidification performance.
