Smart Bluetooth/Wi-Fi Gateway with Alarm Gosund G2

Smart Bluetooth/Wi-Fi Gateway with Alarm Gosund G2

Gosund G2 is a compact Bluetooth/Wi-Fi gateway that will facilitate managing your smart home. With it, you can conveniently control selected devices, such as a smart door lock. The product is compatible with Amazon Alexa and Google Assistant voice assistants, and it is equipped with small indicators that will provide you with information about its status.

Convenient Control of Your Devices

Thanks to this practical gateway, you can connect your devices to the network to gain the ability to conveniently operate them through an app. The G2 model stands out with a range of approximately 10 meters and is compatible, among other things, with smart locks. With its help, you can, for example, remotely unlock doors.

Compatibility with Voice Assistants

Now you can conveniently operate your smart devices, even when you don't have your smartphone with the app on hand. The Gosund gateway is compatible with Google Assistant and Amazon Alexa, allowing you to control paired devices using voice commands. See for yourself that just a few words are enough to, for example, unlock the door lock in the living room!

Key Information at Your Fingertips

The gateway is equipped with special LED indicators that allow you to check its status at any time. Just take a quick look! Blue indicates pairing mode, red indicates a network error, and blue and red together indicate operational mode.
