Smart LED Wifi bulb Broadlink LB4E27 RGB

Ref: 6924826708947

Broadlink LB4E27 smart WiFi LED RGB bulb

Provide light that allows you to adjust your mood for specific conditions and needs. The Broadlink LB4E27 light bulb offers RGB lighting. You can freely adjust the color, brightness or color temperature, and take advantage of convenient operation through an app or voice assistant.

Many possibilities

Planning a movie night or maybe a dance party? With Broadlink lighting you will provide the perfect conditions for any occasion! The bulb offers a choice of colors from the RGB palette, selecting brightness and color temperature. You can also combine effects into scenes and save them to launch your favorite settings with a single click.

Convenience of operation

Feel the convenience of remote operation with the Broadlink app. From it, you will adjust all the parameters of the bulb's operation and plan schedules. This way you will support your daily routine with automation. What's more, you can take advantage of voice control - via Amazon Alexa, Google Assistant, FastCon or IFTTT.

More features

Discover the practical features of the Broadlink equipment! You can adjust the bulb's operation to suit your daily activities. The sunrise and sunset mode allows you to turn on the light at the right time, supporting your habits. What's more, you can also take advantage of the home protection mode, which will run the lights while you're away - providing the impression of a household presence.
