Sonic toothbrush with app, tips set and travel etui S3 (silver)

Bitvae S3 Silver Sonic Toothbrush with App and Accessories

Users who choose the Bitvae S3 Sonic Toothbrush in an elegant silver shade gain the ability to achieve precise oral hygiene by connecting it to the app. This device combines innovative technologies with a unique design, providing users not only with a beautiful smile but also with convenience and ease of use.

Three Intensity Levels and Five Modes of Operation

Our Bitvae S3 Sonic Toothbrush offers users three different intensity levels, allowing them to customize it to their individual needs. Additionally, five different modes of operation, including Clean, Sensitive, White, Tongue, and Smart, enable users to select the most suitable program for their daily dental care. Whether they need gentle or intense cleaning, the Bitvae toothbrush will meet their expectations.

Long-lasting Performance and Pressure Sensor

The Bitvae S3 is also a device that won't disappoint users during long journeys. Just 4 hours of charging provide up to 180 days of operation, which means it can deliver full performance for many months. Additionally, thanks to the built-in pressure sensor, their teeth and gums are protected from excessive pressure during brushing, providing even better dental protection.

Smart App and Real-time Feedback

The Bitvae S3 is not just a toothbrush; it's a complete dental care experience. With Bluetooth connectivity, users can use the free app, which provides real-time feedback. 3D visualization of their teeth allows them to monitor progress and take care of every nook and cranny in their oral cavity. The app guides users through 4 zones and 12 sides, ensuring comprehensive dental care.

Perfect Set for Users

In the set, users will find everything they need for comprehensive oral care. In addition to the toothbrush itself and an elegant travel case, they will receive 3 regular brush heads and one very soft one for special gum care. Additionally, a phone or toothbrush holder will allow them to always keep the device within reach.
