Sonic Toothbrush with App and Bitvae S3 Gold Set

Users who opt for the Bitvae S3 Sonic Toothbrush in an elegant silver shade gain the ability to achieve precise oral hygiene through its integration with an app. This device combines innovative technologies with exceptional design, providing users not only with a beautiful smile but also convenience and ease of use.

Three Intensity Levels and Five Operating Modes

Our Bitvae S3 sonic toothbrush offers users three different intensity levels, allowing them to customize it to their individual needs. Additionally, five different operating modes, including Clean, Sensitive, White, Tongue, and Smart, enable users to select the most suitable program for their daily dental care. Whether they require gentle or intensive cleaning, the Bitvae toothbrush meets their expectations.

Long-lasting Performance and Pressure Sensor

The Bitvae S3 is also a device that won't disappoint users during extended travels. Just 4 hours of charging provide up to 180 days of operation, meaning they can enjoy full efficiency for many months. Additionally, thanks to the built-in pressure sensor, their teeth and gums are protected from excessive pressure during brushing, ensuring even better dental care.

Smart App and Real-time Feedback

The Bitvae S3 is not just a toothbrush—it's a complete dental care experience. Thanks to Bluetooth connectivity, users can use a free app that provides real-time feedback. 3D visualization of their teeth allows them to monitor progress and care for every nook and cranny of their oral cavity. The app guides users through 4 zones and 12 pages, ensuring comprehensive dental care.

The Perfect Set for Users

In the set, users will find everything they need for comprehensive oral care. In addition to the toothbrush itself and an elegant travel case, they will receive 3 regular brush heads and one very soft one for special gum care. Additionally, a phone or toothbrush holder allows them to keep the device within reach at all times.
