GameSir T4 Pro Wireless Controller (White)

The GameSir T4 Pro controller combines modern technology and exceptional functionality, creating the perfect tool for every gamer. With innovative linear trigger buttons, an advanced 6-axis gyroscope, customizable buttons, TURBO function, and impressive LED backlighting, this controller provides unparalleled control and immersion in games. Its versatility and compatibility with various platforms, including Switch, iOS, Android, and Windows, make it an ideal choice for every gamer.

Advanced 6-Axis Gyroscope

The GameSir T4 Pro is equipped with a 6-axis gyroscope that significantly enhances accuracy and immersion in games. It allows for intuitive motion control, which is crucial in dynamic and demanding games. This somatosensory technology enables the controller to register player movements with greater sensitivity, providing smoother and more precise gaming experiences.

Programmable Buttons

Every gamer has their preferences when it comes to controller settings, and the GameSir T4 Pro allows for customization with programmable buttons. This feature enables players to tailor the button layout to their individual needs, which is invaluable in matching the game to personal preferences.

TURBO Function

The TURBO function in the GameSir T4 Pro allows for faster attacks. This is especially useful in fast-paced, action-packed titles where reaction speed determines victory.

Linear Trigger Buttons

The unique linear trigger buttons of the controller resemble a car throttle, allowing for precise control over speed, force, and intensity of actions in the game. This innovation provides gamers with more nuanced control, enabling a more varied gameplay experience.

LED Backlighting

The LED backlighting not only adds aesthetic charm to the GameSir T4 Pro controller but also enhances immersion in the game, especially during sessions in poorly lit rooms. It is a stylish accent that sets this controller apart from the competition.
