Gaming Controller G8 Galileo USB-C with Smartphone Holder

GameSir G8 Galileo Wireless Controller with Phone Holder

Discover a new dimension of mobile entertainment with the GameSir G8 Galileo wireless controller. This revolutionary gadget changes the way you play on your smartphone by combining wireless convenience with advanced features that cater to every gamer. Whether you're a dedicated mobile gamer or looking for a more comfortable way to enjoy games, the GameSir G8 Galileo is designed just for you.

Gaming and Charging Simultaneously

The GameSir G8 Galileo is equipped with an innovative pass-through charging feature, allowing you to enjoy gaming without worrying about your phone running out of battery. It's the perfect solution for long gaming sessions where uninterrupted gameplay is crucial.

Precision Control with GameSir Hall Effect Joysticks

The control sticks utilizing Hall Effect technology ensure 360° precision. Designed for demanding gamers, these sticks provide smooth movements and long-lasting durability, essential for dynamic mobile games.

Comfort and Versatility

The GameSir G8 Galileo controller has an ergonomic shape and is lightweight (weighing only 252g), making it comfortable even during long gaming sessions. Its compact dimensions (217 x 107 x 54mm) make it easy to carry and store.

Compatibility with Various Devices

With the phone holder, the GameSir G8 Galileo is ideal for various mobile device sizes. Additionally, the controller features a 3.5mm audio jack, allowing you to connect headphones for better sound quality during gameplay.
