

## Wireless Controller GameSir T4 Pro (Black)

Wireless Controller GameSir T4 Pro (Black)

Ref: 6936685219687

### GameSir T4 Pro Wireless Controller (black)

The GameSir T4 Pro controller combines cutting-edge technology and exceptional functionality to create the perfect tool for any gamer. With innovative linear trigger buttons, an advanced 6-axis gyroscope, personalized buttons, TURBO function and striking LED backlighting, this controller provides unparalleled control and immersion in games. Its versatility and compatibility with various platforms, including Switch, iOS and Android, as well as Windows, make it an ideal choice for any gamer.

### Advanced 6-axis gyroscope

The GameSir T4 Pro is equipped with a 6-axis gyroscope, which greatly enhances accuracy and immersion in games. It allows for intuitive motion control, which is crucial in dynamic and demanding games. This somatosensory technology allows the controller to register the player's movements with greater sensitivity, providing a smoother and more accurate gaming experience.

### Programmable buttons

Every gamer has his or her own preferences when it comes to controller settings, and the GameSir T4 Pro allows personalization with programmable buttons. This feature allows players to customize the layout of the buttons, which is invaluable in tailoring the game to their personal preferences.

#### TURBO function

The TURBO function on the GameSir T4 Pro allows for faster attacks. This is especially useful in fast-paced, action-packed titles where speed of reaction determines victory.

#### Linear trigger buttons

The controller's unique linear trigger buttons resemble a car's throttle, allowing precise control over the speed, force and intensity of in-game actions. This innovation provides players with more subtle control over the game, allowing for more varied gameplay.

#### LED backlighting

LED backlighting not only adds to the aesthetic appeal of the GameSir T4 Pro controller, but also enhances game immersion, especially during sessions in dimly lit rooms. It's a stylish touch that sets this controller apart from the competition.
