

### Wall charger Remax, RP-U55, 2x USB-C, USB, EU 65W (black)

Ref: 6954851259268

Wall charger American/Chinese Remax, RP-U55, 2x USB-C, USB, 65W (white)

Remax mains charger, RP-U55, 2x USB-C, USB, EU 65W (black)

Charge up to 3 devices at the same time! The RP-U55 network charger from Remax is a compact device with up to 65W of power! It supports fast charging protocols (PD3.0, QC3.0, SCP, PPS, etc.) and provides protection for connected devices, so you can be sure that your devices are not in danger of overheating, overcharging, or short-circuiting, which means they will last longer.

Small in size, big in capabilities

The RP-U55 was made using modern GaN technology. As a result, it was possible to achieve higher performance with a smaller product size. The charger offers a PD of 65W and will successfully charge laptops, smartphones and tablets without taking up too much space. Now you can top up your smartphone in 30 minutes to 50%, and fully charge your Macbook 13 Pro in about 1.5 hours! In comparison, a traditional 5W charger will top up its energy to 20% in the same amount of time. Your time is precious! Don't waste it waiting!

Wide compatibility

The product supports mains voltage in the range of 100-240V, which means that it will work great in sockets of different standards you may encounter on the go. There are 2 USB-C ports and 1 USB-A port at your disposal, which gives you a wide range of equipment charging options - you can successfully connect devices from brands such as Apple, Huawei, Xiaomi, Lenovo and Samsung. The RP-U55 automatically recognizes the connected equipment and adjusts the charging power and amperage to it, ensuring safety against

overheating, short-circuiting, or overcharging. The RP-U55 will allow you to stay connected to your loved ones, keeping your devices charged whenever you need them!
