High-Speed Hair Dryer ANLAN 05-ACFJ31-04E

Ref: 6953156301580

ANLAN 05-ACFJ31-04E Hair Dryer

The ANLAN 05-ACFJ31-04E Hair Dryer combines practical features and minimalist design, ensuring efficient drying and more. Thanks to advanced negative ionization technology, it leaves your hair shiny and moisturized from within while minimizing static. Quiet operation, lightweight design, and an intelligent temperature and airflow control system make the ANLAN hair dryer an ideal choice for those who value comfort and hair health.

Healthy and Shiny Hair

The ANLAN 05-ACFJ31-04E Hair Dryer uses negative ionization technology to provide deep moisturization and shine to your hair. This process also reduces hair static, which is especially important in low humidity conditions, preserving your hair's natural structure and healthy appearance.

Quiet Operation: User Comfort

The device operates at only 60dB noise level, making hair drying much more pleasant. Such low noise levels are perfect for those who value peace and quiet, especially in the morning or evening hours.

Efficient Drying: Innovative Air System

The unique drying technology relies on high air volume rather than just high temperature, protecting your hair from overheating and damage. Two air volume levels (high and low) and four temperature options allow for customization to individual needs and hair types.

Lightweight and Ergonomic: User Convenience

With a weight of only 306g, the hair dryer is incredibly light and comfortable to use. Users can enjoy the comfort of drying even for extended periods without hand fatigue.

Magnetic Nozzle: Ease and Precision of Styling

The magnetically attached and 360° rotatable nozzle allows for easy change of airflow direction and precise styling. This innovative solution enhances the functionality of the hair dryer, enabling quick and efficient hair styling.

Drying Modes: Customized to Every Need

The ANLAN 05-ACFJ31-04E Hair Dryer offers four innovative drying modes tailored to different needs and hair types. The first, Quick Drying mode at 60°C (indicated by a red light), is perfect for those who value speed and want to quickly dry their hair. Next, Comfortable Drying mode at 50°C (orange light) provides gentle drying suitable for everyday use. Refreshing Drying at 30°C (blue light) is an excellent option for those who want to lightly dry their hair while maintaining its natural moisture. The last mode, Care, characterized by alternating bursts of hot and cool air (all three colors flashing), is ideal for hair care, minimizing the risk of thermal damage.

Package Contents

- 1 x Hair Dryer
- 1 x Nozzle
- 1 x Wall Mount
- 1 x User Manual
