Blackhead and Whitehead Vacuum Cleaner ANLAN 01-AHTY22-02A

ANLAN 01-AHTY22-02A Blackhead and Whitehead Vacuum Cleaner

The ANLAN 01-AHTY22-02A Blackhead and Whitehead Vacuum Cleaner is a modern device that combines efficiency, ease of use, and advanced skincare technologies. Ideal for individuals dealing with acne, breakouts, or skin impurities, it offers gentle yet effective cleansing. Additionally, its water resistance and LED light modes make it a versatile tool for daily facial care.

### Effective Skin Cleansing

The ANLAN Vacuum offers a quick and easy solution for removing blackheads, acne, and makeup residues. Its innovative suction technology gently yet effectively cleanses pores, ensuring deep and thorough skin cleansing. It's the perfect way to maintain a clean and healthy complexion.

### IPX5 Waterproof

The device provides IPX5 waterproofing, which means protection against low-pressure water streams. This allows for easy and safe cleaning of the device and its use in various conditions, even during bathing.

### Advanced LED Light Modes

Two LED light modes - red and blue - further enhance skin care. The red mode improves blood circulation and skin elasticity, while the

blue mode effectively reduces acne and whiteheads. It's an innovative combination of cleansing and light therapy for healthier skin.

#### Three Suction Power Levels

The device offers three suction power levels, allowing you to adjust the cleansing intensity to your skin's individual needs. This ensures that every user can choose the most comfortable level, minimizing the risk of irritation.

#### Ease of Use and LED Display

The ANLAN Vacuum is characterized by intuitive operation. The LED display makes navigation through settings easy, and USB charging provides convenience and mobility. The device is also equipped with a set of attachments for precise adaptation to different facial areas.

#### Additional Information

The kit includes a set of skincare tools that aid in the cleansing process. The recommended skincare routine involves washing your face first, using a steamer or hot towel to open pores, then selecting the appropriate attachment and testing it on the lowest suction level, using LED light modes, and finally applying a facial mask. This comprehensive care routine ensures the best results.

#### Package Contents

- Vacuum x 1
