

Nano Facial Steamer ANLAN 01-AZLY21-02E

Nano Facial Steamer ANLAN 01-AZLY21-02E

Ref: 6953156301382

Nano Facial Steamer by ANLAN

Discover a new dimension of facial care with the ANLAN nano facial steamer. This modern device combines advanced technology with ease of use, becoming an essential part of your daily self-care routine. From deep moisturization and cleansing to enhancing nutrient absorption, ANLAN provides salon-quality results in the comfort of your own home.

Ease of Use

The ANLAN nano facial steamer is known for its intuitive operation, making it an ideal choice for everyone. Easy water tank filling and a convenient integrated mirror make daily skincare sessions enjoyable and hassle-free rituals.

Deep Moisturization and Cleansing

Using the power of nano-mist, this device provides deep moisturization and skin cleansing. This gentle yet effective steam reaches the deepest layers of your skin, offering an effect comparable to using multiple face masks.

Advanced Negative Ion Technology

An exclusive feature of the ANLAN nano facial steamer is the production of aerosol with negative ions. This innovative function enhances the absorption of nutrients from your skincare products, maximizing their effectiveness and allowing for deeper penetration into the

skin's structures.

Constant Temperature for a Comfortable SPA

With your comfort in mind, the steamer maintains a constant temperature of 40°C. This is the ideal warmth for delicate facial skin, creating conditions similar to a 20-minute SPA treatment that you can enjoy in the comfort of your own home.

Fast and Effective Mist

It takes just 30 seconds for the device to generate a mist that envelops your face. The shortened waiting time for results allows you to find a moment to refresh and moisturize your skin even on the busiest days.
