Electric Shaver Kensen 06-KWFS31-0GA

Discover the modern solution in men's grooming - the Kensen 06-KWFS31-0GA electric shaver. This advanced product combines performance, precision, and user convenience. With its innovative LED display, intuitive functions, and adaptive shaving technology, Kensen offers not only a fast but also a comfortable shaving experience.

LED Display and Battery Control

The Kensen shaver is equipped with a clear LED display that provides information about the battery status, charging process, and travel lock activation. The low battery reminder function prevents unexpected interruptions during shaving, ensuring continuous and convenient use.

Waterproof and Easy to Clean

Model 06-KWFS31-0GA is characterized by IPX6 waterproofing, allowing easy cleaning of the shaver under running water without the risk of damage. This not only enhances the device's hygiene but also greatly simplifies its daily maintenance.

Adaptation to Facial Hair

The shaver has two rotation speeds - 7500RPM for thinner facial hair and 8600RPM for denser growth, allowing for precise customization

to individual needs. This solution guarantees efficient and precise shaving regardless of the type of facial hair.

Floating Blade Head

The innovative floating blade head perfectly conforms to the contours of the face, ensuring precise and gentle shaving. This technology minimizes the risk of irritation while ensuring the thorough removal of hair, even in hard-to-reach areas.

Efficiency and Quiet Operation

Model Kensen 06-KWFS31-0GA offers up to 90 minutes of operation on a single charge, which is sufficient even for the most demanding users. Additionally, the shaver operates with a noise level of only 55dB, ensuring a comfortable and quiet experience.
