3D Electric Shaver Kensen 06-KTXD32-0GA

The 3D Electric Shaver Kensen 06-KTXD32-0GA is a modern solution for men who value shaving comfort and precision. Designed with various preferences in mind, it allows for both dry and wet shaving, and its advanced technology ensures accuracy and safety during use. The package includes everything you need: the shaver, a USB cable, a cleaning brush, a protective cap, and instructions. It stands out with its elegant black design, low noise level, and efficient performance, making it an ideal choice for the modern man.

Floating Head - Comfort and Precision

The floating head of the Kensen shaver is the key to precise shaving. Thanks to it, the shaver perfectly adapts to the contours of the face, minimizing the risk of irritation. It allows for precise shaving of hard-to-reach areas, providing a consistent result without the need for multiple passes over the skin. This feature increases user comfort, making shaving faster and more efficient.

Dry and Wet Shaving

The 06-KTXD32-0GA model allows for both dry and wet shaving, giving the user the freedom to choose based on preferences and needs. The option for wet shaving is particularly useful for individuals with sensitive skin, as it reduces the risk of irritation. This feature also makes the shaver ideal for use in the shower, which is convenient and time-saving.

IPX5 Waterproof

The Kensen shaver is designed with safety in mind for use in various conditions. Its IPX5 waterproof rating means it is resistant to water streams from any direction, allowing for safe use in the shower and making cleaning easier. Additionally, this feature enhances the durability of the device, protecting it from water damage.

Quiet Operation

A low noise level of 60dB makes the 06-KTXD32-0GA model one of the quieter shavers on the market. This allows for shaving in any place and at any time without disturbing others. This feature is particularly important for individuals who need to shave early in the morning or late at night, providing them with discretion and comfort during use.

Fast Charging and Performance - Reliability in Daily Use

The Kensen shaver is equipped with a fast charging function, allowing for a full charge within 60 minutes. The high number of rotations per minute (7000 RPM) ensures efficiency and speed in shaving, which is essential in daily, busy life.
