

## Filters PolarPro ND8/PL, ND32/PL, ND128/PL for DJI Osmo Pock

Ref: 810148700225

Filters PolarPro ND8/PL, ND32/PL, ND128/PL for DJI Osmo Pocket 3

PolarPro ND8/PL, ND32/PL, ND128/PL filters for DJI Osmo Pocket 3.

The juxtaposition of the effects of ND (Neutral Density) and polarizing filters opens up new possibilities in creating excellent photographs. These filters not only reduce shutter speed for dynamic effects, but also eliminate glare and reflections, making them invaluable when photographing water or other reflective surfaces. Specially designed for the DJI Osmo Pocket 3, these filters work perfectly with your equipment without affecting its use.

High quality workmanship

Designed with professionals in mind, the filters feature not only exceptional functionality, but also solid construction. The aluminum frame ensures reliability and durability in all conditions, while the German CinemaSeries glass, characterized by low refractive index and color neutrality, which guarantees excellent image quality. Thanks to their lightweight design, the filters don't add unnecessary weight to your equipment, allowing you to focus on creating perfect shots.
