Wireless iPad keyboard with tablet holder Omoton KB088 (silver)

Want to make using your iPad easier? With the Omoton wireless keyboard, this will be possible! What's more, for even more comfort, it is equipped with a special pull-out stand on which you can set your tablet. It also offers plenty of useful keyboard shortcuts. This device will connect to your iPad via Bluetooth, and it only needs two AA batteries (not included) to power it.

Slide-out stand

From today, you will be able to work even more comfortably, take notes or simply use the Internet. Thanks to the special extendable stand that the keyboard is equipped with, you will be able to stand your iPad stably. This will not only make you more comfortable, but also save space on your desk! What's more, when you don't need the holder, you can simply fold it up and slide it into the keyboard.

Comfort of use

Omoton's product is compatible with iOS. This means that you can easily pair it with selected tablet models. Moreover, it connects to your devices via Bluetooth, so you can enjoy fast, stable and reliable transmission. In addition, the keyboard features a lightweight and portable design, so you can take it with you on any trip.

More possibilities

The Omoton keyboard was created with comfort in mind, so it is equipped with 12 function keys. You can use them to conveniently adjust the screen brightness or volume. They give you even more options! What's more, the low-profile keys provide high sensitivity and fast response time.

Power supply

To power the keyboard you will need 2 AA batteries (not included), which you can easily buy in many stores. You won't have to replace them often either, as they guarantee a long operating time. What's more, you won't have a problem replacing them, as they are quick and very easy.

Excellent quality

Omoton keyboard is made of the highest quality aluminum, so it is very resistant and stable. Moreover, it is distinguished by its compact and lightweight design, which makes it easy to pack it in your backpack or bag. You can accompany you to the university, work or library, because thanks to the quiet keys you don't have to worry about the sound of clicks disturbing someone!
